

## URGENT NEED:

### Could you or someone you know fill this position?

Greater Lisbon Christian Academy (GLCA) is seeking an experienced educator and/or administrator to oversee the school. GLCA is a K-12 school with a student body of approximately 50 students from a dozen or more countries and 10-12 staff members. Many of our students are children of missionaries. Others are international students who are not from Christian families, but come to us desiring an English education. As the school administrator, you can educate, evangelize, and disciple all in one place.

The opportunity to make a spiritual impact through Christian Education in Portugal is great. Many of the missionary families who send their children to our school were either drawn to or remain in Portugal because of GLCA. Through your service, you'll enable teammates and other tent-makers to serve the community, evangelize, and build relationships with unbelievers with the goal of sharing the hope of Christ.

GLCA is located in Lisbon, Portugal and has a magnificent view of the city. GLCA is operated by Association of Baptists for World Evangelism (ABWE) in Portugal and is a member school of the Association of Christian Schools International (ACSI). GLCA welcomes it's students to campus daily and is not a boarding school. Because this is an ABWE school, the administrator needs to come as an ABWE missionary. Housing and the use of a vehicle is provided for the first year. The current administrator retires May 2021. The new administrator could arrive any time after January 1 to have some overlap before school begins in September.

**Due to the urgency of the need, someone could serve as an interim missionary with a 1-2 year commitment.**

**Please pray and pass this along.**
